- (e) provide comprehensive information if the data will be used for third party purposes, such as advertising or analytics;
- (f) allow users to revoke their consent and uninstall the app, and delete data where appropriate;
- (g) respect the principle of data minimization and only collect those data that are strictly necessary to perform the desired functionality; take the necessary organizational and technical measures to ensure the protection of the personal data You process, at all stages of the design and implementation of the application (privacy by design);
- (h) provide a single point of contact for the users of the application. Provide a readable, understandable and easily accessible privacy policy, which at a minimum informs users about: who they are (identity and contact details), what precise categories of personal data the app wants to collect and process, why the data processing is necessary (for what precise purposes), whether data will be disclosed to third parties (not just a generic but a specific description to whom the data will be disclosed), what rights users have, in terms of withdrawal of consent and deletion of data;
- (i) enable app users to exercise their rights of access, rectification, erasure and their right to object to data processing and inform them about the existence of these mechanisms;
- (j) define a reasonable retention period for data collected with the app and predefine a period of inactivity after which the account will be treated as expired;
- (k) with regard to apps aimed at children: pay attention to the age limit defining children or minors in national legislation, choose the most restrictive data processing approach in full respect of the principles of data minimization and purpose limitation, refrain from processing children's data for behavioural advertising purposes, either directly or indirectly and refrain from collecting data through the children about their relatives and/or friends.

9.5 If any consent from the End User to the collection, use, processing, transmission and/or disclosure of such End User Data is denied or withdrawn, You may not collect, use, process, transmit and/or disclose the End User Data or perform any other actions for which the End Users consent has been denied or withdrawn.
